Micronomic 50[®] Compact Treatment Unit

for the ENT consulting room

The budget-friendly MICRONOMIC 50 is a mobile treatment unit designed to accommodate the maximum number of integrated functions according to specific requirements. Providing maximum storage space, the MICRONOMIC 50 incorporates an articulated arm that can be positioned for convenient accessibility to the handpieces. Each handpiece holder is equipped with an infra-red sensor which automatically triggers the integrated functions. The two instrument storage drawers are fitted with dividers and trays that slide from side to side in order to optimise instrument storage capacity. Also included are containers for waste and used instruments with letter-box openings. The MICRONOMIC 50 comes with a durable polyurethane worktop and lacquer finished front panels in one of three standard colours. This unit is particularly suitable for ENT consulting rooms with limited space.

MICRONOMIC PLUS®

instrumentation unit for the ENT consulting room

The mobile MICRONOMIC PLUS is a storage-unit particularly suitable for use as an extension to the MICRONOMIC 50. Pictured below are three ways in which the MICRONOMIC 50 and MICRONOMIC PLUS can be combined.

The MICRONOMIC PLUS incorporates:

- Integrated pull-out instrument tray
- 5 large storage drawers with dividers and trays
- Recess in polyurethane worktop for aluminium tray
- Unit lighting

◀ Placed next to one another forming an extended straight unit.

▶ Separate on either side of the patient chair for a bi-manual set up.

◀ Curved interconnecting shelves render optimum ergonomic working conditions and provide more space.

BUDGET-FRIENDLY

Standard integrated functions:

- Fibre optic light source
- Suction system c/w disposable secretion receptacle

Optional integrated functions:

- Compressed air system c/w 2 liquid & 1 powder spray bottles (prevents cross infection)
- Ear syringe with electronic temperature control
