nxt™ non stick - pure 925 sterling silver

Superior non-stick technology

For the first time, adeor uses pure 925 Sterling Silver for its nxt™ non-stick technology. An alloy with a very high silver content (92.5 % pure silver) and unsurpassed thermal and electrical conductivity.

Thanks to these superior thermal conductivity properties, our bipolar instruments offer the industry-leading nxt™ non-stick effect. Another advantage of our forceps is gained through the polishing process of the silver tips. This further increases the non-stick effect and also facilitates the cleaning and reprocessing procedures. By using solid 925 Sterling Silver tips, the non-stick effect of the adeor bipolar forceps ensures consistent results for the lifetime of the forceps.

nxt™ non stick - reines 925er sterling silber

Überlegene Non-Stick Technologie

adeor verwendet für seine nxt™ Non-Stick Technologie erstmals reines 925er Sterling Silber. Eine Legierung mit extrem hohem Silbergehalt (92,5 % reines Silber) und unübertroffener thermischer sowie elektrischer Leitfähigkeit.

Dieser thermischen Leitfähigkeit von 925er Sterling Silber sind die einzigartigen Antihafteigenschaften der nxt™ non-stick Pinzetten zu verdanken. 925er Sterling Silber liefert derzeit die besten non-stick Eigenschaften auf dem Markt für Bipolarpinzetten. nxt™ non-stick Pinzetten verfügen im Gegensatz zu Konkurrenzprodukten über polierte Silberspitzen, wodurch der non-stick Effekt noch weiter verstärkt wird. Die glatte Spitzenoberfläche bietet neben dem verbesserten non-Stick Effekt weitere Vorteile bei Reinigung und Wiederaufbereitung. Der non-stick Effekt bleibt durch die Verwendung von massivem 925er Sterling Silber über die gesamte Lebensdauer der Pinzette erhalten.

BIP-S742US us pin connector

Ø 1.2 x 4 mm straight

working / total length 110 / 270 mm

BIP-S743EU eu flat connector

BIP-S743US us pin connector

Ø 0.5 x 4 mm up angled

working / total length 110 / 270 mm

BIP-S746EU eu flat connector

BIP-S746US us pin connector

Ø 0.8 x 4 mm up angled

working / total length 110 / 270 mm

BIP-S747EU eu flat connector

BIP-S747US us pin connector

Ø 1.2 x 4 mm up angled

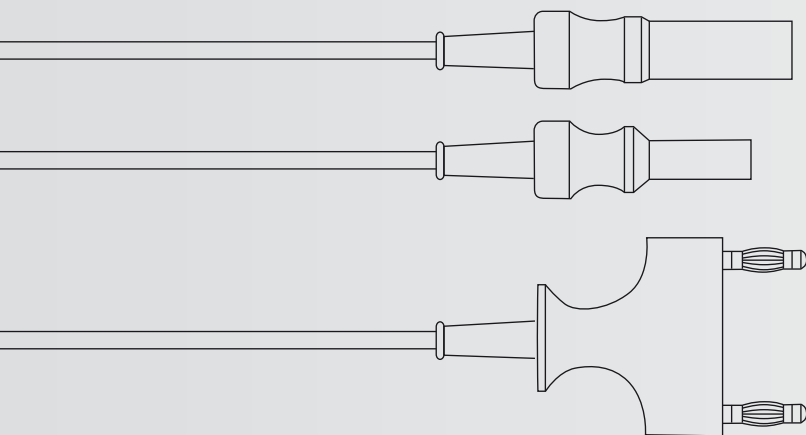

working / total length 110 / 270 mm

BIP-S748EU eu flat connector

BIP-S748US us pin connector

nxt™ SLIMLINE BIPOLAR CABLES

RE-USABLE NON-STERILE & SINGLE-USE STERILE

nxt™ slimline bipolar cables

For the production of our nxt™ slimline bipolar cable, we use a specially developed manufacturing process. The Santropene™ components are directly sprayed onto the cable, resulting in an ultra-slim connector profile. A further benefit of this manufacturing technology is the guaranteed tightness of the cable, thereby ensuring a superior durability and long lifetime.

The nxt™ slimline bipolar cables offer a perfect ergonomical addition to every bipolar forceps on the market. The ultra-slim connector profile leads to a seamless extension of the forceps, without restricting the surgeon. Angled bipolar cables become redundant.

Bei der Herstellung unserer nxt™ Slimline Bipolarkabel kommt ein speziell entwickeltes Verfahren zum Einsatz, bei welchem die Santropene™ Komponenten direkt auf das Kabel aufgespritzt werden. Dadurch kann ein extrem niedriger Steckerdurchmesser erreicht werden. Ein weiterer Vorteil dieses Verfahrens ist die garantierte Dichtheit des Kabels, welche in einer langen Lebensdauer resultiert. nxt™ Slimline Bipolarkabel sind die ergonomisch ideale Ergänzung zu jeder Bipolarpinzette. Der geringe Steckerdurchmesser führt zu einer optimalen Verlängerung der Bipolarpinzette, welche den Chirurgen in keiner Weise einschränkt und beim Handling unterstützt. Pinzette und Kabel werden zu einer Einheit. Abgewinkelte Kabel werden dadurch überflüssig.

nxt™ storage and sterilization tray for bipolar forceps - stainless steel

Secure handling and excellent reprocessing results

The adeor nxt™ instrument tray for bipolar forceps is the ideal solution for the reprocessing of up to 5 adeor bipolar forceps.

- manufactured using electropolished stainless steel (no. 1.4301)
- rounded edges minimize the risk of accidental damage of the outer sterilization packaging
- superior cleaning results through open wire cage design
- integrated twist lock prevents unintentional opening
- silicone fixtures for a secure fit
- compatible with most third party forceps

nxt™ Lagerungstray für Bipolarpinzetten - Edelstahl

Sicheres Handling und optimale Reinigungsergebnisse

Das adeor nxt™ Lagerungstray für Bipolarpinzetten ist die ideale Lösung für die Aufbereitung von bis zu 5 adeor Bipolarpinzetten.

- Gefertigt aus elektroliertem Edelstahl 1.4301
- Glatte Kanten beugen einer Beschädigung des Verpackungsmaterials beim Sterilisationsvorgang vor
- Sehr gute Reinigungseigenschaften durch die offene Siebkonstruktion
- Hohe Sicherheit durch integrierten Drehverschluß
- Individuell angepasste Silikonhalterungen
- Geeignet für adeor Bipolarpinzetten sowie Fremdfabrikate

nxt™ bipolar forceps tray

Superior cleaning results through open wire cage design

Optimale Reinigungseigenschaften durch offene Drahtkonstruktion

Integrated twist lock prevents unintentional opening

Hohe Sicherheit durch integrierten Drehgriff

Customized silicone fixtures for safe and easy handling

Individuell gestaltete Silikonhalterungen für besonders sicheres und einfaches Handling
