Innovative Healthcare Solutions Delivering Quality, Value & Trust

Pelican Feminine Healthcare are at the forefront of medical device innovation in Gynaecology and Obstetrics. Through attention to detail, materials sourcing and exceptional manufacturing capabilities, devices such as the PELISpec® are the market-leading products for health professionals around the world. Pelican FH continues its commitment to innovative products, with the FETOfit® and PELISpec® Pro-Wall, engaging with health professionals to identify unmet clinical needs and develop a new product's pipeline that will add to the high quality, trusted devices that Pelican are recognised for.

Pelican FH partner with NHS Trusts, Academic Partnerships, Universities, Start-ups and Individuals to Research products that make a real difference to the professionals who use them and the people who receive the care required. Through taking proactive measures to ensure that products are BPA and Latex-free, Pelican FH set themselves apart and ensure that quality is at the heart of what we do.

Pelican FH's innovative products have revolutionised the single-use market and are the products of choice for health services and professionals worldwide.

Through innovation Pelican FH have brought products that reflect the quality and value required by clinicians and ensures that they can trust the device in their hand. We act with integrity in everything that we do and provide a service that is second to none.

Quality
Assurance
Committed to
providing quality
products,
manufactured
to the highest
standards.

Delivering market leading innovations to the highest quality standards is reinforced by **stringent monitoring** of manufacturing processes with over 15,000 quality control checks performed annually and across Pelican Feminine Healthcare's product range.

Pelican FH has invested heavily in the design and manufacture of products including the market-leading PELIspec® - **strength tested every four hours** to ensure it meets stringent product specifications. These checks are conducted at a state-of-the-art manufacturing facility in Cardiff, which since 2011 has served both UK and international markets with production of over fifteen million vaginal speculum.

The company is focused on providing quality products, manufactured to the highest standards, using **superior medical grade materials** and continuous improvement is the hallmark of Pelican FH's activities.

Pelican Feminine Healthcare are full accredited for ISO 13485:2003 and all products are CE marked in accordance with European Directive 93/42/EEC. All sterile processes are assessed for sterility by an MHRA accredited regulatory body.

Each device has a unique product identification number which can be recorded on patient notes for traceability.

All products are Latex-free, sterile, and comply with National Decontamination Guidelines.

PELIspec® Vaginal Speculum Range

Fail
Safe

The marketing-leading PELIspec® vaginal speculum range continues to lead the way in providing a high quality single-use speculum to the healthcare market, and has been the speculum of choice for discerning medical professionals for **over 20 years**.

Engineered and moulded in the UK using specially chosen medical grade BPA-free (Bisphenol-A) plastic, the PELIspec® vaginal speculum range provides the ultimate combination of strength and flexibility with patient safety.

“Fail-SAFE” points are uniquely incorporated into the PELIspec® design, ensuring that in the event of ‘Vaginismus’ or other unanticipated stress the device will flex and break safely outside the vagina.

The PELIspec® range offers a **wide variety** of speculum solutions tailored to each procedure requirements from built-in smoke extraction and light source to the ‘Pro-Wall’ with additional wall support. The more conventional core range accommodates for every patient, available in a wide range of sizes from virgin and medium to medium-long and broad, ‘with’ and ‘without lock’.

Pelican Feminine Healthcare is committed to promoting awareness of cervical cancer and continues to donate **5p from every box of PELIspec® vaginal speculum sold**, to Jo’s Cervical Cancer Trust - the only UK charity dedicated to women and their families affected by cervical cancer and cervical abnormalities. We have now **donated over £40,000*** to support this vital cause.

*Figure accurate as of March 2015

Pelican are contributing 5p for every box of PELIspec sold

Registered charity in England and Wales, number: 1132642
Registered charity in Scotland, number: SC041236

“Strong, but flexible
design engineered
with safety
in mind”

PELIspec[®] Vaginal Speculum

The market leading PELIspec[®] is a strong, sterile, disposable vaginal speculum, available in 5 sizes. Selected sizes are also available without the locking mechanism.

PELIspec[®] can be used for gynaecological procedures, including cervical screening, IUD fittings and vaginal examinations.

Features

- ✓ Proven strength with built-in 'Fail-Safe' points
- ✓ Textured handles for enhanced grip
- ✓ Crystal clear for maximum visibility
- ✓ BPA and Latex-free
- ✓ Unique product identification number for traceability

PELIspec[®] Pro-Wall

NEW

The PELIspec[®] Pro-Wall is the 'Professional' solution specially designed for use in cases of anterior vaginal wall laxity.

Based on the market leading PELIspec[®] vaginal speculum, the device features a Latex-free sheath configured to efficiently secure an unobstructed view of the cervical anatomy to ensure maximum visibility during the procedure.

Features

- ✓ Ready applied Latex-free sheath
- ✓ Proven strength with built-in 'Fail-Safe' points
- ✓ BPA and Latex-free
- ✓ Textured handles for enhanced grip
- ✓ Unique product identification number for traceability

Manufactured
in the UK

PELIspec[®] with Light Source

Based on the market leading PELIspec[®] vaginal speculum, the unique PELIspec[®] with Light Source features a built-in light source attachment configured to provide effective directional light for maximum visibility during gynaecological procedures.

Available in a 'Starter pack' - containing 2 x PELIspec[®] (1 x Medium, 1 x Medium Long), 2 x Reusable Light source leads, 2 x plastic lead covers, 1 x Re-usable Battery Pack.

Features

- ✓ Directional light source for maximum visibility
- ✓ Compact re-usable battery pack with belt clip
- ✓ Sealed light source insertion point to ensure protection during use
- ✓ Proven strength, with 'Fail-SAFE' Points uniquely built into each PELIspec[®]
- ✓ Available in two sizes – Medium and Medium Long
- ✓ Reusable Leads supplied with plastic covers to reduce cross-contamination

*Lead covers included/ **Lead covers not included

PELIspec[®] with Smoke Extractor

The PELIspec[®] with Smoke Extractor is specially designed for use during loop diathermy procedures.

Based on the market leading PELIspec[®] vaginal speculum, the device features a built-in extraction tube configured to efficiently remove smoke produced during the procedure.

The PELIspec[®] with Smoke Extractor is deliberately manufactured in white to best reflect light and ensure maximum visibility.

Features

- ✓ Effective smoke extraction
- ✓ Proven strength with built-in 'Fail-Safe' points
- ✓ BPA and Latex-free
- ✓ Textured handles for improved grip

Fail Safe

Manufactured in the UK

Code	Description	Units
400111	PELIspec [®] with Smoke Extractor - Medium	20

400113	PELIspec [®] with Smoke Extractor - Broad	20

PELIspec® Sims Speculum

The PELIspec® Sims Speculum is commonly used for inspection of the vaginal walls and can be used as an alternative to the traditional Cusco design.

The design and shape of the PELIspec® Sims Speculum is characterised by its two right-angled bends and differing sized ends.

Features

- ✓ Crystal clear ensuring greater visibility of the vaginal wall
- ✓ Smooth rounded ends for patient comfort
- ✓ Mirrors design of metal equivalent
- ✓ Easy central grip handle
- ✓ Two differing end sizes for convenience

Manufactured
in the UK

Code	Description	Units

Proctoscope & Lighting System

Pelican Proctoscope

The Pelican Proctoscope is specially designed for use during proctoscopy and features a crystal clear barrel with a smooth moulded introducer for gentle insertion into the rectum. It is recommended that PELJelly Lubricant is used in conjunction with the device to minimise discomfort upon insertion.

The Pelican Proctoscope incorporates a housing to allow connection to an external light source which is sealed to minimise the risk of cross-infection.

Features

- ✓ Sealed housing to allow connection to an external light source
- ✓ Crystal clear
- ✓ Latex and BPA-free
- ✓ Unique product identification number for traceability

Manufactured
in the UK

400380	Pelican Proctoscope - Medium	25
400390	Pelican Proctoscope - Large	25

Pelican Lighting System

Complete fibre optic lighting system for use in conjunction with the Pelican Proctoscope.

Range of adaptors is also available to allow connection to an existing light source.

Features

- ✓ 1.8 metre fibre optic illumination cable
- ✓ 150 watt halogen light source
- ✓ Output intensity adjustment
- ✓ Detachable adaptor on cable to allow sterilisation
- ✓ 12 months warranty
- ✓ Conforms to European standards

Gynaecological & Instrument Lubricant

PELIjelly is a sterile lubricant, ideally suited for gynaecological examinations.

- ✓ **Colourless, odourless and water-based**
- ✓ **Easy to apply, safe to use.**

An article published by Margie Givens, Senior Biomedical Scientist at Forth Park Hospital, examined the use of lubricating gels during cervical screening. A summary of this article concluded that:

“PELIjelly may be better used (than KY Jelly) when taking cervical samples”*

“PELIjelly still had sufficient (cervical) cells for diagnosis. The KY sample did not...”*

The full article is available to download online via the Pelican Feminine Healthcare website

*Givens, M (2008) “Cytology Uncovered! Lubricating Gels - a Personal Experience”. *Obs Gynae & Midwifery, News, Autumn 2008, pp.16-18.*

“Easy to apply,
safe to use”.

PELjelly Lubricant

PELjelly is a sterile, water based lubricant designed for use in gynaecological, digital and instrument examinations with no effect on DNA.*

The sachet format allows minimal waste and also removes any concerns regarding cross-infection.

Features

- ✓ Convenient Sterile 5g sachet
- ✓ No effect on DNA*
- ✓ Silk like consistency to minimise discomfort from procedure
- ✓ Colourless and fragrance free
- ✓ Easy to apply and will not stain
- ✓ 100 pack dispensing carton

Scissors & Forceps

Pelican Spongeholder

The Pelican Spongeholder is designed to ensure visibility is not impeded when used in conjunction with a PELISpec® vaginal speculum.

The robust design gives the user full control of the device and the grooved tips ensure a secure grip of swabs.

Features

- ✓ Grooved tip for maximum grip
- ✓ Enhanced secure locking mechanism
- ✓ Specifically designed for use with swabs
- ✓ Cost effective alternative to metal with parallel performance

Manufactured
in the UK

Code	Description	Units
400300	Pelican Spongeholder	50
400302	Pelican Spongeholder	5

Pelican Vulsellum

The Pelican Vulsellum is characterised by a 3:4 toothed grip specially designed to offer a gentle but secure grip on the cervix.

The Pelican Vulsellum has an angled head to maximise access to the cervix during the procedure and improve visibility.

Provides an alternative choice for practitioners who prefer a more evenly spread grip over a singled toothed (Tenaculum) grip.

Features

- ✓ Enhanced secure locking mechanism
- ✓ Specifically designed tooth combination to minimise discomfort and reduce trauma
- ✓ Angled tips allow greater visibility
- ✓ Cost effective alternative to metal with parallel performance

Manufactured
in the UK

Code	Description	Units
400335	Pelican Vulsellum	50
400336	Pelican Vulsellum	5

Pelican Tenaculum

The Pelican Tenaculum features a precise single toothed grip with secure locking mechanism, ideal for holding the anterior lip of the cervix during procedures.

The Tenaculum provides an alternative choice to practitioners who prefer a single toothed grip over a more evenly spread grip.

Features

- ✓ Precise single toothed grip
- ✓ Secure locking mechanism
- ✓ Cost effective alternative to metal with parallel performance
- ✓ Specifically designed to allow greater visibility of the cervix

Manufactured
in the UK

Code	Description	Units
400330	Pelican Tenaculum	50
400331	Pelican Tenaculum	5

Pelican Long Scissors

The Pelican Long Scissors are ideal for cutting IUD threads following the introduction of an intra-uterine device (IUD). The slender, flexible handles allow full manoeuvrability of the device, and the blade design ensures that the threads are captured securely for a clean cut.

Features

- ✓ Specially designed for cutting coil threads
- ✓ Sharp blade for a clean cut
- ✓ Firm finger grip for greater control
- ✓ Long handle for ease of use

Code	Description	Units
400320	Pelican Long Scissors	50
400321	Pelican Long Scissors	5

Intra-Uterine Device (IUD) Removal & Fitting

Pelican PELIpack - IUD Removal & Fitting Pack

The Pelican PELIpack contains all the instrumentation necessary to remove and fit an intra-uterine device. The instruments are presented in an individual sterile pouch offering a convenient time-saving solution.

All instruments from the Pelican PELIpack are also available separately.

Contents

- PELIspec® Medium (Pack code 400351) or PELIspec® Medium Long (Pack code: 400352)
- Pelican Spongeholder
- Pelican Vulsellum
- Pelican 3/4mm Dilator
- Pelican Uterine Sound
- Pelican Long Scissors
- Pelican Coil Remover
- Gallipot, Gauze, Drape & Tray

Manufactured
in the UK

Code	Description	Units
400351	PELIpack IUD Removal & Fitting Kit - Medium	4
400352	PELIpack IUD Removal & Fitting Kit - Medium Long	4

Pelican IUD Pack - Removal & Fitting Pack

The Pelican IUD Pack is a single-use procedure pack containing a mixture of single-use metal and plastic instruments to remove and fit an intra-uterine device.

Each sterile peel pouch incorporates a peel-off label which can be attached to patient notes.

Contents

- PELIspec® Medium or PELIspec® Medium Long
- Metal Rampley Spongeholder Forceps*
- Metal Teale Vulsellum Forceps
- Metal Hegar Dilator*
- Metal Mayo Scissors
- Pelican Uterine Sound
- Pelican Coil Remover*
- Gallipot*, Cotton Wool Balls*, Drape & Kidney Dish

Manufactured
in the UK

Code	Description	Units
400706	Pelican IUD Pack (Medium)	4
400707	Pelican IUD Pack (Medium Long)	4
400708	Pelican IUD Fitting Only Pack (Medium)	4

*Pack codes: 400706 and 400707 only

Pelican Coil Remover

The Pelican Coil Remover is specifically designed to remove intra-uterine devices and is characterised by an angled tip with a 2:1 tooth combination.

The robust design gives the user full control of the instrument and the “V” designed tip ensures a secure grasp of the coil thread to facilitate retrieval of the intra-uterine device. The tip size has been reduced and angled for optimal visibility during the procedure.

Features

- ✓ Secure locking mechanism
- ✓ Angled tip to optimise visibility
- ✓ Specially designed tooth combination facilitates easy IUD retrieval

Code	Description	Units
400317	Pelican Coil Remover	50
400318	Pelican Coil Remover	5

Pelican Thread Retriever

The Pelican Thread Retriever is designed to quickly and easily locate lost IUD threads and can also be used to sound the uterus for the presence of the intra-uterine device.

Seven specifically designed notches at 10mm intervals (on either side), combined with a long handle, allow for greater control and optimum retrieval of IUD threads.

Features

- ✓ Thumb recess for enhanced grip and control
- ✓ Flexible stem with smooth rounded tip to sound the uterus
- ✓ Seven 10mm interval notches for optimum retrieval of IUD threads
- ✓ Long handle (245mm) for ease of use

Manufactured
in the UK

Code	Description	Units
400565	Pelican Thread Retriever	25
400560	Pelican Thread Retriever	5

Cervical Dilator & Uterine Sound

Pelican Uterine Sound-Dilator

NEW

The Uterine Sound-Dilator (“USD”) is a strong but flexible, single-use, double-ended combined device designed for gentle dilation of the cervix and to assess the depth of the uterus.

The smooth and rounded ends are specially designed to allow gradual dilation of the cervix, whilst reducing risk of perforation.

This ‘2-in-1’ instrument, provides added convenience when fitting intra-uterine devices

Features

- ✓ Strong but flexible moulded plastic
- ✓ Ideal for coil-fitting procedures
- ✓ Smooth, rounded tips for reduced risk of perforation
- ✓ Clear and precise 1cm depth indicators
- ✓ 27.7cm long with a maximum diameter of 5.5mm

2 in 1

Manufactured
in the UK

Code	Description	Units
401000	Uterine Sound-Dilator	50
401010	Uterine Sound-Dilator	10

Pelican Dilator

The Pelican Dilator is designed to gently dilate the cervical 'os' to facilitate access to the uterus, and is ideal for preparing the cervix for the introduction of an intra-uterine device.

The Pelican Dilator is tapered to allow gradual dilation in 1mm increments from 2mm to 6mm (using two devices).

Features

- ✓ Strong but flexible moulded plastic
- ✓ Central thumb hold for ease of use
- ✓ Tapered ends allow gradual cervical dilation
- ✓ Smooth, rounded tips for reduced risk of perforation

Manufactured
in the UK

Code	Description	Units
400342	Pelican Dilator 3/4mm	100
400343	Pelican Dilator 3/4mm	10
400344	Pelican Dilator 5/6mm	100
400345	Pelican Dilator 5/6mm	10
400347	Pelican Dilator 7/8mm	100
400348	Pelican Dilator 7/8mm	10

Pelican Uterine Sound

The Pelican Uterine Sound is specifically designed to confirm uterine depth prior to the insertion of an intra-uterine device. The rounded end ensures a gentle introduction of the device through the cervical 'os' into the uterine cavity.

The Pelican Uterine Sound is a slender, flexible gauge with 1cm indicators to allow immediate visual confirmation of uterine depth.

Features

- ✓ Notches allow measurement of the uterine depth
- ✓ White in colour to aid visualisation
- ✓ Mirrors the metal equivalent for ease of use
- ✓ Increased patient comfort due to design
- ✓ Unique product identification number for traceability

Manufactured
in the UK

Code	Description	Units
400310	Pelican Uterine Sound	100
400311	Pelican Uterine Sound	10

Obstetrics Range

Pelican FETOfit®

NEW

FETOfit® is a disposable device specifically designed to secure both 'TOCO' and 'CTG' transducers quickly and easily for strapless foetal monitoring.

Unlike standard circumferential straps, FETOfit's hypoallergenic adhesive pads adhere directly to the front of the abdomen.

The flexible material moulds to body contours, offering a secure fit whilst promoting maternal comfort and mobility whilst facilitating access to the back in the event of an epidural.

Features

- ✓ Universal attachment to suit all transducers
- ✓ Quick and easy to re-position
- ✓ Easy access for epidural
- ✓ Disposable device for single-person use
- ✓ Secure fit
- ✓ Safeguards patient comfort & mobility

Code	Description	Units
400625	FETOfit®	25

PELIhook Amniotic Membrane Perforator “Amnihook”

The PELIhook Amniotic Membrane Perforator is designed to safely rupture the amniotic membrane whilst minimising the risk of injury to the foetus.

The sharp hook cleanly snags the membrane, and the rounded tip ensures that the hook does not inadvertently come into contact with maternal tissue.

Features

- ✓ The curved PELIhook is anatomically shaped to allow ease of use
- ✓ Designed to safely rupture the membrane
- ✓ Textured thumb grip on the handle
- ✓ Option of a straight PELIhook for optimal control and comfort
- ✓ Sterile and single-use
- ✓ Latex-free

Code	Description	Units
SH2	PELIhook Amniotic Membrane Perforator - Straight	100
KH2	PELIhook Amniotic Membrane Perforator - Curved	100

Model-Med: Anatomical Training Models

Pelican Feminine Healthcare are the authorised distributors of the renowned Model-Med range of anatomical models for Gynaecology and Obstetrics medical simulations.

All models are made of superior materials that offer a far more realistic simulation of human tissue than other medical models available. The soft synthetic flesh will not rip or tear. The models do not require any special lubricants; any standard water based lubricant, such as PELJelly, can be used.

- ✓ **Durable**
made of a very soft, highly elastic, and very durable material.
- ✓ **Easy to clean**
simple maintenance instructions ensures the models will last a long time.
- ✓ **Easy to repair**
easy to repair if accidentally damaged.

The range includes models for:

- Assessment of cervical dilatation and foetal presentation
- Full birth simulation
- Instrumental delivery of the foetus
- Full gynaecological model for speculum and bi-manual examination

The Model-med range is supplied with a one year warranty.

'Sophie'

Full Birth Simulator

Sophie's Mum is designed for the simulation of cephalic birth, breech birth, and shoulder dystocia. Sophie's Mum has a full pelvis, the joints of which are slightly loosened to simulate the movement in those joints during childbirth. The baby must travel around the 'Curve of Carras' and will be born in an accurate simulation of the birth.

Sophie is a new-born baby weighing 4.0 kg (8.8lbs) and measuring 45cm (18 inches) in length. She contains a fully articulated metal skeleton that behaves the same as a human skeleton.

 Full care and handling instructions can be downloaded online from the Pelican Feminine Healthcare website.

Features

- ✓ Provides a highly realistic birthing experience
- ✓ Sophie includes a fully articulated metal skeleton
- ✓ Sophie's mum simulates the movement of that in childbirth

Code	Description	Units
OT002	Full Birth Base Unit	1
FT001	Foetus (Sophie)	1
UT008	Post Partum Uterus	1
PL001	Placenta	1
UT009	Post Partum Haemorrhage Uterus	1

'Charlie'

Obstetric Trainer

The Charlie Obstetric Trainer consists of Charlie (the head), Charlie's mum the base unit, and three different cervix: primipara, multipara, and an oedematous cervix.

Charlie and his mum are made from a remarkably soft synthetic flesh that provides a highly realistic experience for obstetric training.

 Full care and handling instructions can be downloaded online from the Pelican Feminine Healthcare website.

Features

- ✓ Provides a highly realistic experience
- ✓ Available with 3 different types of cervix
- ✓ Both models are made from a soft synthetic flesh material
- ✓ Tough flesh material does not tear or split

Code	Description	Units
OT001	Charlie's Mum Obstetric Trainer Base Unit	1
FH001	Foetal Head (Charlie)	1
CM001	Cervix Multipara	1
CP001	Cervix Primipara	1
CO001	Cervix Oedematous	1

Lucy & Lucy's Mum Instrumental Delivery Trainer

Lucy's Mum is specially designed to practice instrumental delivery, particularly vacuum assisted delivery.

Lucy's head is the average shape of the foetal head. It can be used to practice forceps delivery, but is particularly suited to vacuum delivery. Together with the Lucy's Mum model it provides an excellent training platform for medical professionals.

Full care and handling instructions can be downloaded online from the Pelican Feminine Healthcare website

Features

- ✓ Provides a highly realistic experience
- ✓ Lucy's head mimics the shape and weight of an actual foetal head
- ✓ Can be used with forceps
- ✓ Ideal for practising vacuum assisted delivery
- ✓ Other skin tone options available

Code	Description	Units
OT004	Lucy's Mum Instrumental Delivery Base Unit	1
FT002	Lucy Vacuum Extraction Head	1
LMUK001	Lucy's Mum Instrumental Delivery Base Unit & Head (Light skin tone)	1
LMUK002	Lucy's Mum Instrumental Delivery Base Unit & Head (Dark skin tone)	1

Gynaecological Trainer

The Model-Med Gynaecological Trainer allows a totally convincing manual and visual examination of the female reproductive system. A speculum can be used on the model to simulate procedures, such as a pap smear.

Using a unique clip-fit system, different uteri can be swapped in and out of the base unit. Seven types of uterus are available.

 Full care and handling instructions can be downloaded online from the Pelican Feminine Healthcare website.

Features

- ✓ Provides a highly realistic experience
- ✓ Available with 7 different types of uterus
- ✓ Suitable for use with a speculum for practising smear taking
- ✓ Synthetic flesh material is soft but tough and will not tear or split

Code	Description	Units
GN001	Trainer Base Model	1
UT001	Small Uterus	1
UT002	Medium Uterus	1
UT003	Large Uterus	1
UT004	Fibroid Uterus	1
UT005	Retroverted Uterus	1
UT006	Hollow Uterus	1
UT007	Ovarian Cyst Uterus	1
CX001	Extra Clip	1

NEW

FETOFit®

Strapless foetal monitoring

FETOFit® is a disposable device specifically designed to secure both 'TOCO' and 'CTG' transducers quickly and easily for foetal monitoring.

Unlike standard circumferential straps, FETOFit's **hypoallergenic** adhesive pads adhere directly to the front of the abdomen for a **secure fit** with patient **comfort** and **mobility**.
