MEDIVATORS® DEFENDO™

Sterile Single-Use Valves

Endoscope valves are vital, sophisticated devices that require meticulous cleaning procedures

Safety

- Eliminate the variables from cleaning and reprocessing
- A disposable alternative to reusable endoscope valves

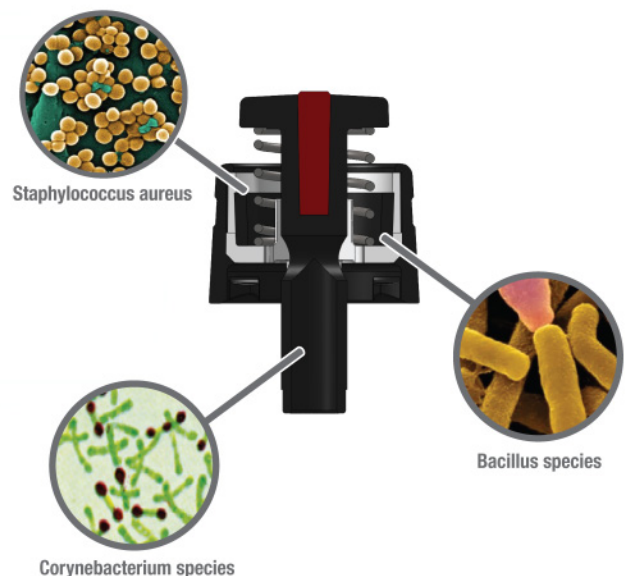

Efficiency

- Over 30 steps to proper manual cleaning and reprocessing of Biopsy, Air/Water, and Suction Valves
- Cleaning process is difficult, if not impossible

Valve Reprocessing is Difficult

Healthcare-related infections from endoscopy continue to occur, for two reasons:

- 1) Failure to adhere to current disinfection guidelines.
- 2) The complex design of endoscopes, which includes “springs and valves” as part of the endoscope that complicate adequate disinfection.¹

Peace of Mind, Every Time

Air/Water, Suction and Biopsy Valve Kit

The most advanced protection for your patients by eliminating the need for tedious reprocessing of reusable valves

Available in a kit that includes:

- Air/Water Valve
- Suction Valve
- Biopsy Valve
- Single-Use Auxiliary Water Port Connector

PENTAX® Kit

OLYMPUS® Kit

No Port, No Problem

Not every GI Endoscope has a dedicated auxiliary water port for irrigation

The MEDIVATORS DEFENDO Y-OPSY® Irrigator solves this problem by allowing you to biopsy and irrigate simultaneously through the working channel.
