# Microscope Covers

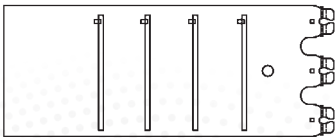

## Glass Lens

With increasing hygienic standards in operating theaters, microscope covers become state-of-the-art in modern western hospitals. The new microscope cover glass lens from **SPIGGLE & THEIS** enables a brilliant reproduction of the image from the situs to the users's eyes. Beside its high picture quality and excellent light transmission, the microscope cover is very easy to use and fast to apply.

**Advantages:**

- Excellent optical quality
- No image distortion when zooming
- Ideal price-performance ratio

## Drape protective glass

### Glass lens

Laboratory experiments have shown that glass lenses reproduce the high quality of the microscope lens, even when zooming in and out, without unwanted distortion of the field of vision.

Laboratory experiments have shown, that the SPIGGLE & THEIS glass lenses meet the highest requirements of the operating room and do not lead to image distortion, even at the edge of the intraoperative field of vision.

#### Examination with Siemens star

The Siemens star is a pattern used to test the optical quality of lenses. The focus is on the sharpness of the optical reproduction quality.

## Sterile Covers

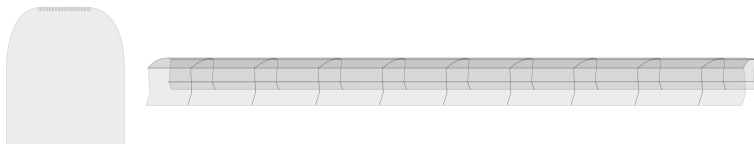

### Mobile x-ray units (C-Arms)

#### Description:

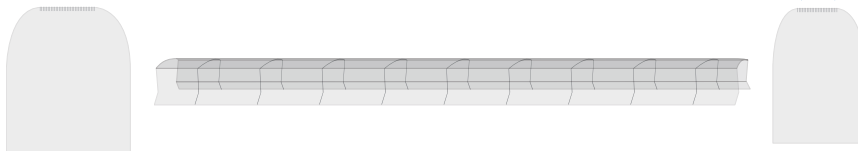

- Material: polyethylene
- One-piece universal covers as well as two- and three-piece covers for specific systems
- All two- and three-piece covers with special clip system to drape the c-shape
- Patented clip system allows easy movement and adjustment of the c-arm whilst draped (retaining sterility)
